Disaster Damage:

In 2017, communities that had not yet had a chance to fully recover from the 2015 and 2016 floods were impacted again. Hurricane Harvey, a regenerated tropical depression, made landfall on August 25, 2017, as a Category 4 hurricane, bringing with it extreme wind gusts and, in some places, up to 60 inches of rain in 5 days. The hurricane caused catastrophic flooding and at least 82 human fatalities,due in part to the weather system stalling over the Texas coast. The windspeeds recorded over South Texas may have been underestimated, especially near the coast and close to the eyewall of Hurricane Harvey, as many observation stations were disabled prior to landfall of the eye of the hurricane; however, a peak wind gust of 150 mph was reported near Rockport.

Hurricane Harvey made landfall twice and is viewed by many as three separate events: the initial landfall in Aransas County; unprecedented rainfall in the Houston metroplex and surrounding areas; and the second landfall on August 29, 2017, in southeast Texas near the cities of Orange, Beaumont, and Port Arthur. These events caused not only wind damage but also widespread flooding.

The 49 CDBG-DR eligible counties affected by Hurricane Harvey cover 15 percent or 39,496 square miles of land area in the state and contain approximately 32 percent of the state's population. The land area affected is roughly the size of the state of Kentucky.7 Nearly 8.9 million Texans live in the affected counties.

The two catastrophic characteristics of Hurricane Harvey: (1) hurricane-force winds and (2) a slow-moving storm bringing historic rainfall and flooding.

By the time the rain stopped, Hurricane Harvey had dumped almost a year's worth of rainfall in just a few days. So much rain fell during the hurricane that the National Weather Service had to update the color charts on their graphics in order to effectively map it. Two additional shades of purple were added to represent rainfall totals for 20-30 inches and "greater than 40 inches" ranges.

Recovery Needs:

Recognizing the state's long and well-documented history of flooding, hurricanes, wildfires, and droughts, as well as its ongoing efforts to mitigate future disaster effects in its most vulnerable Page 17 of 213 areas, the GLO continues its commitment to rebuilding while prioritizing resiliency. In assessing unmet needs, it is important to consider the additional costs of safeguarding housing and community infrastructure investments from future disasters. As such, Texas will not only assess projects and consider state-run programs that replace or repair lost property but will also seek to invest resources in efforts that promise to mitigate damage from a wide range future disaster types. Although this can increase costs initially, mitigating efforts can greatly reduce the cost of future damages by a ratio of 6:1. The success of this long-term recovery practice was seen firsthand during Hurricane Harvey. Resilient-enhanced projects from previous CDBG-DR efforts suffered less damage from Hurricane Harvey: construction projects designed to prevent future flooding, mitigate further loss, and decrease evacuation times.

Single family home resiliency solutions are expected to add approximately 10 to 15 percent to the total cost per home; multi-family resiliency solutions add 15 to 20 percent to the total cost per project; and infrastructure resiliency solutions add 15 to 20 percent to the total cost per project. Resiliency solutions are varied and dependent on the respective area's Threat and Hazard Identification and Risk Assessment (THIRA).

Single family home resiliency solutions may include elevating the first floor of habitable area; breakaway ground floor walls; reinforced roofs; storm shutters; use of ENERGY STAR appliances and fixtures; and mold and mildew resistant products. Multi-family resiliency solutions include elevation; retention basins; fire-safe landscaping; firewalls; and landscaped floodwalls.

Buyout programs support hazard mitigation, floodplain management goals, and resiliency by removing homeowners from the floodplain, thus eliminating vulnerability to future flooding situations. After homes are purchased, the structures are demolished or relocated. The land reverts to a natural floodplain, converts into a retention area, or is retained as green space for recreational purposes. The buyout option serves multiple objectives and provides a resiliency option versus rebuilding within a floodplain. Buyouts help prevent repetitive loss and extreme risk to human health and safety. Buyouts conducted sooner rather than later prevent homeowners from making repairs and investing funds in properties that they then may not want to sell.

Activity Description:

State administrative costs including subrecipient administration costs will not exceed five (5) percent, $251,210,750. Planning and administrative costs combined will not exceed 20 percent.The provisions outlined under 42 U.S.C. 5306(d) and 24 CFR §570.489(a)(1)(i) and (iii) will not apply to the extent that they cap state administration expenditures and require a dollar-for-dollar match of state funds for administrative costs exceeding $100,000. Pursuant to 24 CFR §58.34(a)(3), except for applicable requirements of 24 CFR §58.6, administrative and management activities are exempt activities under this Action Plan. Once contracted, the GLO will allow the drawdown of pre-agreement costs associated with eligible disaster recovery activities dating back to the date of the disaster for subrecipients and the GLO with appropriate documentation. The GLO will retain the full 5% allocated for administrative costs associated with the CDBG-DR allocation for purposes of oversight, management, and reporting. The only exception will be an allowance for up to 2% of program amounts for costs associated with housing activities that require administrative type activities in Harris County and the city of Houston programs. Additionally, Harris County and Houston will be allowed to spend up to 10% of program amounts for costs directly related to implementation of housing activities and 6% for non-housing and infrastructure type activities. Once programs are identified by Harris County and Houston, administrative costs will be outlined in subsequent Action Plan Amendment budgets. Engineering and design activities will be capped at 15% of the total project award unless special services are necessary; subject to GLO approval. The GLO, Harris County, and the city of Houston will limit planning costs to 5% of each respective allocation to complete projects as defined in 24 CFR 570.205.

Activity Description:

The Texas Community Watershed Partners (TWCP) utilizes the Community Health and Resource Management (CHARM) scenario platform to help communities make informed planning decisions by hosting workshops throughout disaster-impacted areas.
Through post-Harvey community surveys, the Texas General Land Office (GLO) identified critical community needs, including better disaster information, comprehensive planning tools,
and capacity building activities.
The CHARM software is currently bolstering local planning efforts by running scenario planning workshops with local communities. When integrated with the disaster database project, this enhancement would provide local communities with the information, tools, and technical expertise to make informed planning decisions.

Responsible Organization	Organization Type	Proposed Budget
Houston, City of	Local Government	$ 41,599,116.84

Location Description:

Activities to take place throughout in the City of Houston. Zip Codes 77001 - 77009, 77011 - 77051, 77053 - 77096, 77098, 77099, 77339, 77345, 77373, 77377, 77489 and 77530.

Activity Description:

The Harvey Buyout Program will remove multifamily housing units from areas with high flood risk. The acquisition of the existing multifamily properties and land will create green space, park amenities, and/or detention areas. This will serve to reduce density in vulnerable areas. The program is intended to assist residents with moving out of areas that have been impacted by multiple disasters or are at high risk of flooding from future disasters. The program is also intended to reduce the impact of future disasters by creation of open space and detention areas to help absorb water and mitigate street and residential flooding in the future. The acquisition of 5312 Clarewood Drive is dually funded with the 2016 Floods Buyout Program and the Harvey Buyout Program, with the beneficiaries of this project attributed to activity 19-076-008_MI_BP-LMI_Houston. Removing these housing units will serve 42,120 LMI beneficiaries. These activities will meet the low to moderate-income area benefit national objective.

Location Description:

Housing activities shall take place in the City of Houston.

Activity Description:

The Subrecipient will offer interim mortgage assistance for an estimated three hundred eighty-five (385) households of which it is estimated that three hundred eighty-five (385) will be Low to Moderate Income households. Assistance will be provided to homeowners being served under the Homeowner Assistance Program who are making both a mortgage payment on their storm-damaged home and making a rental payment for their temporary home. These homeowners may be eligible to receive up to twenty (20) months of assistance based on the lesser of their monthly mortgage and temporary rental housing payments. This option may be considered when the rehabilitation or reconstruction of a home extends beyond three (3) months,
